Mil:

is the unit of measure used to describe the thickness of plastic. For example, a 1 mil bag is thinner than a 3 mil bag. The most common bag is a 1 mil, slightly thicker than a Dry Cleaner's bag, which is typically a .5 mil or less. The most popular home furnishings bag is a 3 mil.

Gauge (GA):

is the measurement of thickness of the bag or film. In the United States, it is normally expressed in mils (other countries typically use microns).

QUILTED FURNITURE COVERS

NHFA offers the finest form-fitted, quilted covers that money can buy! These premium covers are made of a colorfast, heavy-duty solid color fabric, have thick cotton batting with tight zigzag lock-stitching with a color coded binding for easy identification! *Item# 220043 features a drawstring closure.
